NORTHSTAR ANALYTICS - SAMPLE RESEARCH REPORT

Fictional company data for testing only. Reporting year: 2025.

1. Company overview and financial results

Northstar Analytics builds analytics software for small businesses.

Revenue in 2024: USD 10 million.

Revenue in 2025: USD 13.4 million.

Year-over-year revenue growth in 2025: 34 percent.

Gross margin in 2025: 72 percent.

Customers at year end: 1,200.

Customer retention rate: 92 percent.

The largest customer segment is retail, followed by healthcare.

These figures are invented and are not investment guidance.

2. AI strategy and research assistant architecture

The company plans a PDF research assistant using retrieval augmented generation (RAG). Text is extracted from uploaded PDF documents.
Documents are split into chunks of 1,000 characters with 200-character overlap. Local embeddings are stored in a FAISS vector index.
For each document query, the retriever returns up to four chunks.
Groq generates answers using the retrieved evidence.
Serper provides web search for recent information and comparisons.
The agent can search the PDF, search the web, or use both tools.
Document answers should cite PDF page numbers.
Web answers should cite source URLs.

Uploaded PDFs and chat are held in session memory, not durable storage.
Scanned image-only PDFs require OCR before text retrieval.

3. Risks, targets, and missing information

The 2026 revenue target is USD 16 million. This is a target, not a result.
The main risks are customer churn, API outages, and incorrect citations.
Before public deployment, the team plans authentication, rate limits,
and testing under concurrent user load.
The report does not state net profit, employee count, or market share.
It does not provide industry growth averages or current market news.
The report does not claim that its fictional company exists online.

Suggested testing questions:
What was revenue growth in 2025? Cite the PDF page.
Explain the RAG workflow described in this report.
What is the 2026 revenue target, and is it an achieved result?
What was net profit? State whether the report provides this figure.
Compare this fictional RAG design with current guidance online.
